### Jhovanie Flores – Full Stack Software Developer

Passionate and detail-driven Software Developer with hands-on experience building modern, responsive web applications using **Laravel**, **React**, **Vue**, and **Tailwind CSS**. Skilled in crafting scalable backends with **MySQL**, integrating APIs with **Postman**, and managing projects using **Git**. Known for clean code, strong UI/UX instincts, and the ability to rapidly translate ideas into production-ready features. Ready to bring high-impact value to forward-thinking teams.

## 🧰 PROFESSIONAL EXPERIENCE

05/2023 – 06/2024

Davao City,  
Philippines

### RAG IT SOLUTION, Jr Software Developer

Developed and maintain multiple website using VUE JS, REST API, I also assist Senior developer on the backend using Laravel passport.

07/2024 – 12/2024

Davao City,  
Philippines

### University of Mindanao, College Instructor

I served as an Instructor at the University of Mindanao, where I delivered hands on lectures and practical lab sessions to undergraduate students, focusing on web development using PHP and Laravel, as well as database design with MySQL. I also introduced students to basic Python programming, emphasizing logical thinking and problem solving. My responsibilities included designing instructional materials, exercises, and projects that reflected real-world software development practices. I encouraged the use of version control by integrating Git into class projects and fostered a collaborative learning environment by mentoring students through project implementation and debugging.

02/2025 – 06/2025

Remote

### Aero IDX, Software Developer

I contributed to the development team by completing task based modules across both backend and frontend, leveraging Laravel, Vue.js, Inertia.js, and Tailwind CSS. My role involved building dynamic interfaces and robust API logic, ensuring seamless integration between the server side and client side components. I collaborated closely with the team to deliver features efficiently, following best practices in full-stack development.
